**Figure 1.** A schematic diagram of the experimental setup used to measure the effect of the magnetic field on the thermal conductivity of the nanocomposites.

Figure 1. A schematic diagram of the experimental setup. The light source (laser) emits a beam that passes through a lens and a polarizer. The beam is then focused onto a sample stage, which holds a sample and a reference mirror. The reflected light from the sample and the reference mirror is collected by a lens and focused onto a photodetector.
